GIDION DEPARI

Applied AI Engineer

Medan, Indonesia | gidion.depari2@gmail.com | +62 851-2103-6340
github.com/Gidion123 | linkedin.com/in/gidion2 | Portfolio

PROFESSIONAL SUMMARY

Information Systems graduate focused on Applied AI Engineering, with hands-on experience developing RAG applications, LLM-powered workflows, and end-to-end machine learning systems. Built and evaluated projects spanning hybrid retrieval, evidence-grounded AI, FastAPI integration, controlled VPS deployment, and MLOps observability.

TECHNICAL SKILLS

Programming: Python, SQL
Applied AI & LLM Systems: Retrieval-Augmented Generation (RAG), Hybrid Retrieval, Embeddings, LLM Applications, Tool-Calling Agents, Retrieval Evaluation
Machine Learning: scikit-learn, XGBoost, PyTorch, Model Evaluation
Backend, Apps & Data: FastAPI, Streamlit, PostgreSQL, pgvector, REST APIs
MLOps & Observability: Docker, MLflow, Prometheus, Grafana, Langfuse, Git, GitHub Actions

PROJECTS

JobFit — Evidence-Grounded AI Job Matching GitHub

- Built and deployed an evidence-grounded AI job-matching application using hybrid retrieval, LLM-based requirement analysis, source-linked CV evidence, and FastAPI/PostgreSQL integration.
- Improved held-out macro P@5 from 0.533 (search-order baseline) to 0.733 (final ranking) across three synthetic CV profiles using the complete ranking pipeline.

Stock Research RAG Assistant GitHub

- Developed a citation-grounded RAG assistant for Indonesian equity research, integrating PDF retrieval, market-data access, and deterministic Python financial calculations.
- Evaluated retrieval on a five-document development benchmark (HitRate@8: 0.8571; MRR@8: 0.4712); integrated Langfuse tracing and deployed the application to a VPS.

House Price MLOps GitHub

- Engineered an end-to-end XGBoost house-price prediction system (holdout R-squared: 0.926; 290 observations), with MLflow experiment tracking and FastAPI model serving.
- Containerized the API and Streamlit application using Docker; integrated Prometheus/Grafana monitoring and statistical drift checks.

EXPERIENCE

Pejuang Apoteker Nov 2020–Mar 2026
Co-Founder / Social Media Marketing

- Co-founded Pejuang Apoteker; used Instagram Insights and audience research to guide marketing strategy; the business reported 82.94% revenue growth in 2024.
- Led and mentored a three-person team, coordinating social media execution, performance monitoring, and growth strategy.

RevoU Tech Academy Feb–Jun 2024
Project Leader — Technology Capstone (Training Program)

- Led an 11-member team across two Data Analytics and Software Engineering capstones, coordinating project delivery; one team project earned a score of 100.

EDUCATION

Universitas Methodist Indonesia 2021–2025
Bachelor's Degree in Information Systems; GPA: 3.93/4.00, Cum Laude

Dibimbing — Data Science & AI/ML Bootcamp, Batch 42
Mar–Nov 2026; In Progress

CERTIFICATIONS

BNSP — Certified Associate Data Scientist (CADS), May 2025
Microsoft Applied Skills — Azure AI Document Intelligence, Apr 2025
